

UNIT NUMBER: 178

11/04/92

UNIT NAME: C-724-A Paint Spray Booth

REGULATORY STATUS: AOC

LOCATION: Inside Plant Security Area, Inside of C-724-A Building.

APPROXIMATE DIMENSION: 3 feet deep by 15 feet wide by 8 feet high

FUNCTION: To capture and collect paint drift during paint operations.

OPERATIONAL STATUS: Active

DATES OPERATED: Early 70's - Present.

SITE/PROCESS DESCRIPTION: The system would operate similiar to a vent hood pulling paint drift through a cascade of water. The water would then collect in a tank at the base of the system. The waste is currently drained from the tank and drummed to be characterized and disposed of.

WASTE DESCRIPTION: PCBs ranging from 0.3 to 4.0 ppb have been identified as present in the waste.

WASTE QUANTITY: Unknown.

DESCRIPTION OF RELEASE: Possible releases could have occurred through the vent or the plant sanitary and/or storm sewer system .

DOCUMENTATION OF NO RELEASE: N/A

RFI NECESSARY: YES
