

DMSA C-333-03
Solid Waste Management Unit (SWMU) Assessment Report

SWMU/AOC NUMBER: 258

DATE OF ORIGINAL SAR: 12/01/00

DATE OF SAR REVISIONS: 03/15/09, 03/01/10

REGULATORY STATUS: SWMU

LOCATION: Northeast quadrant of the C-333 Process Building between columns T18-19/V18-19.

APPROXIMATE DIMENSION OR CAPACITY: 1,873 ft²

FUNCTION: Temporary storage of materials.

BRIEF HISTORY: This storage area was created in the late 1980s as a supplemental waste storage area when the generation rate of low-level waste (LLW) exceeded the capacity of existing LLW storage facilities. On December 31, 1996, this area was released by the United States Enrichment Corporation to the U.S. Department of Energy (DOE) as a DOE Material Storage Area (DMSA).

From July 2008 to September 2009, DOE characterized the materials in this DMSA in accordance with the DMSA Characterization/Remediation Plan, which was incorporated as Appendix E of the 2003 Agreed Order. The *Final Inventory and Characterization Report (FI/CR)* was submitted September 25, 2009, to the Kentucky Division of Waste Management (KDWM). KDWM approved the FI/CR on November 5, 2009.

Resource Conservation and Recovery Act (RCRA) closure activities will be performed as set forth in the *Agreed Order Closure Plan for the DOE Material Storage Areas at the Paducah Gaseous Diffusion Plant, Paducah, Kentucky, BJC/PAD-720/R3*, approved on April 14, 2006. The *Notification of Intent to Proceed with Closure* for this SWMU was submitted on December 8, 2009, for KDWM approval.

OPERATIONAL STATUS: Inactive

DATES OPERATED: 1987 to 2009

SITE/PROCESS DESCRIPTION: An inside DOE storage area located in the northeast quadrant of the C-333 Process Building.

WASTE DESCRIPTION: This SWMU currently is empty. Newly discovered RCRA regulated hazardous/mixed waste formerly stored included circuit boards, lamp starters, light bulbs, an iron pipe with lead joints, lead packing, an emergency light assembly with bulb and internal components, one container of wood/mops/buckets/rags, and one container of waste samples. The Toxic Substances Control Act regulated asbestos-containing material (ACM) formerly stored included an insulation, brake linings, and asbestos contaminated personal protective

equipment (PPE). The ACM also was categorized as LLW due to radiological contamination. The LLW formerly stored consisted of wood pallets, containers of metal items (e.g., metal shavings and chips, tools, nuts and bolts, c-clamps, and miscellaneous metal pieces/parts), and containers of canisters, concrete blocks, and floor sweep. Solid waste formerly stored consisted of containerized paper/plastic/rope/cardboard/dirt and waste solid samples. A detailed description of the characterized waste can be found in the FI/CR.

WASTE QUANTITY: Currently 0 ft³; waste quantity removed 4,005 ft³

SUMMARY OF ENVIRONMENTAL SAMPLING DATA: No sampling of environmental media has occurred.

DESCRIPTION OF RELEASE AND MEDIA AFFECTED: None Known

GROUNDWATER:	None Known
SURFACE WATER:	None Known
SOIL:	None Known
ECOLOGY AFFECTED: (i.e., threatened/endangered species):	None Known

DOCUMENTATION OF NO RELEASE: The *Notification of Intent to Proceed with Closure* submitted to KDWM on December 8, 2009, documents that no signs of spills or releases were found. There have been no known spills or releases of materials from this SWMU to the environment.

IMPACT ON OR BY OTHER SWMU/AOC: There is no evidence that this SWMU impacts or is being impacted by other SWMUs.

PRG COMPARISON: N/A

RFI NECESSARY: No. This SWMU is inside an operational process building with a concrete floor. All wastes have been removed from this DMSA. The unit is being proposed for no further action since it no longer is active, has no evidence of a release to the environment, and is not believed to pose a risk to human health or the environment.

OPERABLE UNIT ASSIGNMENT: N/A
