

DMSA C-337-06
Solid Waste Management Unit (SWMU) Assessment Report

SWMU/AOC NUMBER: 313

DATE OF ORIGINAL SAR: 12/01/00

DATE OF SAR REVISIONS: 03/01/09

REGULATORY STATUS: SWMU

LOCATION: Northwest quadrant of the C-337 Process Building between columns T18-19/U18-19.

APPROXIMATE DIMENSION OR CAPACITY: 460 ft²

FUNCTION: Temporary storage of materials.

BRIEF HISTORY: The storage area was created in the late 1980s as a supplemental waste storage area when the generation rate of PCB/LLW exceeded the capacity of existing Toxic Substances and Control Act (TSCA) storage facilities. This area was deleased by the United States Enrichment Corporation to the U.S. Department of Energy (DOE) as a DOE Material Storage Area (DMSA) on December 31, 1996.

From May 2008 to June 2008, DOE characterized materials in this DMSA in accordance with the DMSA Characterization/Remediation Plan, which was incorporated as Appendix E of the 2003 Agreed Order. The *Final Inventory and Characterization Report (FI/CR)* was submitted July 14, 2008, to the Kentucky Division of Waste Management (KDWM). KDWM approved the FI/CR on October 30, 2008.

Resource Conservation and Recovery Act closure was not required for this SWMU, since no hazardous wastes were stored in this unit, per the 2003 Agreed Order.

PRESENT OPERATIONAL STATUS: Inactive

DATES OPERATED: 1987 to 2008

SITE/PROCESS DESCRIPTION: An inside DOE storage area located in the northwest quadrant of the C-337 Process Building.

WASTE DESCRIPTION: This SWMU currently is empty. The TSCA regulated PCB/LLW/asbestos containing material formerly stored consisted of asbestos insulation that was contaminated with PCBs from the hydraulic fluid used in the hydraulic system associated with the autoclave. The LLW formerly stored included wood pallets and secondary containment materials (i.e., Hypalon, polyvinyl chloride diking, and plywood). A detailed description of the characterization can be found in the FI/CR.

WASTE QUANTITY: Currently 0 ft³; waste quantity removed 1,391 ft³.

SUMMARY OF ENVIRONMENTAL SAMPLING DATA: No sampling of environmental media has occurred.

DESCRIPTION OF RELEASE AND MEDIA AFFECTED: None Known

GROUNDWATER:	None Known
SURFACE WATER:	None Known
SOIL:	None Known
ECOLOGY AFFECTED: (i.e., threatened/endangered species):	None Known

DOCUMENTATION OF NO RELEASE: None

IMPACT ON OR BY OTHER SWMU/AOC: There is no evidence that this SWMU impacts or is being impacted by other SWMUs.

PRG COMPARISON: N/A

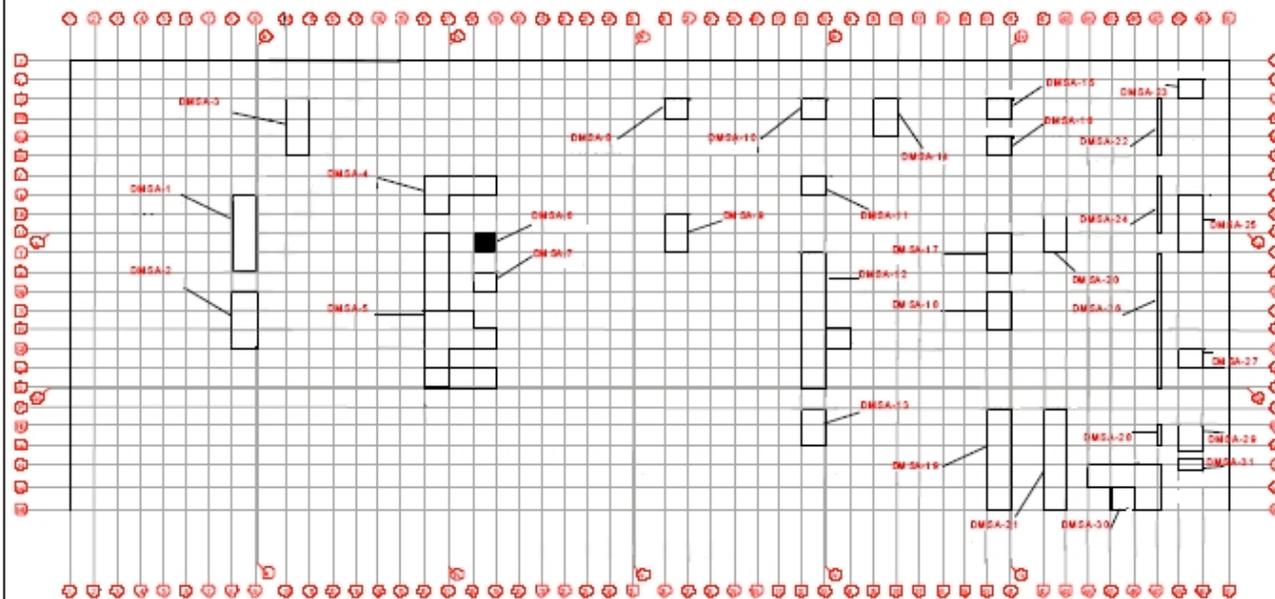

RFI NECESSARY: No. The SWMU is inside an operational process building with a concrete floor. This unit is being proposed for no further action since it no longer is active, has no evidence of releases to the environment, and is not believed to pose a risk to human health or the environment.

OPERABLE UNIT ASSIGNMENT: N/A
